Supporting the ENVIRONMENT

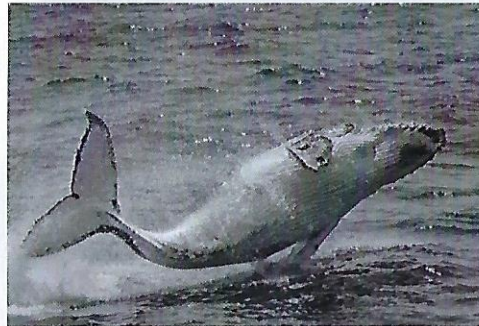

ESRAG Moreton Bay is for the protection of the Moreton Bay Marine Park.

The MBMP is federally protected via the Ramsar Convention on Wetlands to which Australia is a signatory. Australia is also a party to the Convention on the Conservation of Migratory Species of Wild Animals. Together these provide protection for the rich diversity of life found within the Moreton Bay Marine Park (MBMP). They also enrich outcomes for human recreational activities and enhance the livability of the region, and the catchments and waterways that feed into Moreton Bay. The above map—courtesy of The Moreton Bay Foundation, demonstrates the area of interest for our chapter

CLIMATE CHANGE IMPACT

Climate change is impacting the biodiversity of our region is affecting and how we interact with nature. For example, global warming is affecting turtle nesting by migrating south along the beaches of the MBMP. Plus, we read and hear daily of the many species that are increasingly susceptible to extinction. Many more are also threatened by habitat loss due to human activities. Climate change and habitat loss together imperil the livability of our region. Thus, we have to reduce our impact on Mother Earth.

Rotary invite you to take on the three “A’s” – Awareness, Anticipation & Action and to determine your level of impact on our planet by using this simple calculator.

GOVERNMENT SUPPORT

The Climate Council [CC] has issued a report on the impact climate change will have for the livability of the community.

The QR code here provides more important information.

The Climate Council supports councils by way of the “Cities Power Partnerships” program to lead and encourage councils and community groups to enact social change to the benefit of the community and to be an integral part of how we live.

ROTARY CLUBS HAVE A ROLE TO PLAY

District Rotary Clubs are now a part of the social change. This being the 7th Area of focus for Rotary. ESRAG Moreton Bay is here to support your club in a variety of ways—just reach out.

Fun Fact: The Coral Reefs of Moreton Bay are more diverse than the Caribbean
