

Dear Members

How can you be part of Recycling Futures?

By using your extensive networks to assist us in accessing Used Lead Acid Batteries (ULAB's).

If you have a friend, business associate or family member involved in a service station, mechanical workshop, marine centre, mower repairs, transport, farm machinery, engineering, etc. are you able to approach them to see what they do with their ULAB's and ask if they would be prepared to donate them to Rotary as part of our fund raising to support our community. Alternatively, Bob is happy to go with you to meet and explain the benefits of donating ULAB's to Rotary.

Shirley has already used her network to approach a mechanical workshop and we will go and speak with them with a view to having them donate their ULAB's because of the added value that Rotary can bring to the community. Bob looks forward to hearing from you. His mobile is 0429 438 128.

The collection of ULAB's is only one part of Recycling Futures but it will enable us to develop an ongoing income stream while exploring the possible development of a joint venture with Redlands City Council based on a need that will be beneficial to the Redlands Community.

Gavin and Bob have been involved in discussions with Redlands City Council and, in conjunction with the Board, are preparing a joint venture proposal in terms of ULAB's, recycling and landfill reduction.

Yours in Rotary

John Simpson
President
